**1-888-52-PRINT**

I just wanted you to know that we began the semester last week, and the students began using GoPrint. We all love it. The students are finding it so easy to use, and they are very excited about it (as are we--the faculty and staff). Thanks for making such a user-friendly product!

#### **Northeast Alabama Community College**

We adopted GoPrint several years ago. We have found it exceptionally reliable, flexible, and easy to use. In contrast to other printing cost recovery systems which we used previously, our experience with GoPrint is that it simply works. System downtime has been minimal. Training patrons to print through GoPrint is a simple matter--the release station user interface is clean, uncluttered and intuitive. The vendor has always been quite responsive to our needs, even writing new drivers for GoPrint specifically to support the particular debit-card system used on our campus. In sum, we are very pleased with our GoPrint system, which has been highly effective in achieving cost-recovery in computer-lab and public workstation printing.

#### **Medical Library at Louisiana State University Health Sciences Center in Shreveport**

We're using GoPrint to authenticate student quota based printing against our Active Directory. It took a while to get to this point but the GoPrint solution has been rock solid and even setup as quota stations, it helped sell the idea for pay color printing.

#### **California State University, Dominguez Hills**

This is a great cost-saving tool, providing a tremendous return on investment, and I encourage you to deploy it. I have an exhaustive Cost-Benefit analysis, and it proves that GoPrint's Pay-for-Print will more than pay for keeping all of your SRC and classroom computers 3 years old or newer!"

#### **University of Phoenix Southern Region**

Feel Free to use us as a reference, we are happy.

#### **University of San Francisco**

Your service to our system was, and still is, the best service from a vendor that I have had. As an up-date on the system..... we love it.

#### **San Antonio College**

The whole implementation has been very successful here. We're saving a lot of paper, which was one of our goals. We were also able to configure free printing for anyone wanting a print-out of their course schedule, tuition reports/statements, etc. We're very pleased with the system.

#### **Columbia College Chicago**

We've been customers of GoPrint since 1997. It is probably the most intuitive, and easiest for our students to negotiate of any software interface in the library.

#### **Middle Tennessee State University**

It's no surprise that your company is so successful...customer care is driven from the top!

#### **Robert W. Woodruff Library at Atlanta University Center**

**Price Sheet Setup Screen**

#### **GOPRINT EXTRAS**

- Free Site Evaluations – To Insure Optimum Efficiency & Best R.O.I.
